

# Korea's public resource opening and sharing service, 「GongyuNuri」

The Ministry of the Interior and Safety of the Republic of Korea is implementing a project where facilities and items held by public and administrative organizations are made available to the public. The project will allow for efficient use of resources and various benefits to the public. The integrated public resources sharing platform 「GongyuNuri」 allows anyone to use available public resources by browsing, reserving, and paying for them.

「GongyuNuri」 has over 140,000 items, including meeting rooms, parking lots, sports facilities, accommodations, cultural facilities, research and experiment equipment, household tools, toys, blood pressure monitor, etc., held by the central and local governments and public

organizations.

The Ministry of the Interior and Safety annually selects best practices and provides financial support for the local governments to expand the public resources sharing service and enhance the service quality.

In addition to allowing for the sharing of public resources, 「GongyuNuri」 offers information on parking lots of public organizations to be opened for free during the Lunar New Year's Day and Chuseok holidays. Furthermore, it provides information on 701 national and public camping sites and recreational forests, 41,939 cooling service shelters, and 17,743 city parks nationwide to support people's daily activities and leisure.

Meanwhile, the Ministry and local governments have lent epidemic prevention supplies, such as thermometers, sprayers, disinfectors, and disinfectants, and provided information on screening and vaccination centers since 2021 to help residents cope with COVID-19.

The Ministry of the Interior and Safety plans to make the 「GongyuNuri」 service available on web portals, such as Naver and Kakao, to make it more accessible and convenient for the public.

## Status of resources registered on the GongyuNuri

(Aug. 25, 2022)
